

OIS Add-On Licenses

APPLICATION	LICENSE NAME	LICENSE DESCRIPTION	FUNCTIONALITY
OPERA OIS	OPI_BIDA	Access All Datamart Views	The OPI_BIDA license code can only be activated in a central environment when either the OBI or OCIS license codes are active. OPI_BIDA provides access to all of the Datamart views without using the OBI Interface.
OPERA OIS	OPI_BIEX	Access All Opera BI Datamart Views, Extended Views, and Modules.	In a PMS or ORS environment, the OPI_BIEX license code can be activated and is not dependent upon any other license codes. OPI_BIEX accesses all Opera BI Datamart Views, Extended Views, and Modules and enables all Central Datamart Functionality such as Sync Utilities and Delivery of Datamart Messages in OXI. The OBI application settings group will be visible with all parameters accessible. Users can query all Opera BI Datamart Fact and Dimension data without using the OBI interface.
OPERA OIS	OPI_BIUI	OPERA BI User Interface	Activates the Opera Business Intelligence user interface for a single property. This automatically provides access to OCIS Datamarts, which when queried, can be viewed through the OBI interface.
